Jordan Lee

Information Technology Student | Cybersecurity & Data Analysis

FICTIONAL DEMO RESUME - For upload and matching tests only.

Fairfax, VA | jordan.lee@example.com | https://example.com/jordan-lee

Summary

Information technology student with hands-on practice in network monitoring, incident response, and Python automation. Seeking an internship that combines security analysis with clear technical documentation.

Education

B.S. Information Technology, George Mason University

Expected graduation: May 2027 | Relevant coursework: Networking, Cybersecurity, Database Management

Experience

Security Operations Intern | Neighborhood Technology Lab

June 2026 - August 2026 | Fictional training organization

- Reviewed simulated network alerts and documented incident response steps.
- Used Python and SQL to summarize log records and identify recurring errors.
- Maintained Linux lab systems and wrote technical documentation for repeatable checks.

Projects

Security Log Analyzer - Built a Python tool that groups authentication events, flags repeated failed logins, and exports a daily report for review.

Network Monitoring Lab - Configured a small Linux network, practiced traffic analysis, and tracked changes with Git.

Skills

Python, Linux, Cybersecurity, Networking, Incident Response, Technical Writing, Git, SQL, Data Analysis

Interests

Threat Intelligence, Open Source
